THE FOUR ROLES OF AN EFFECTIVE BOARD MEMBER

The Board Dynamics Index was built on the concept that there are certain roles that each board member must play. These roles are: Facilitator, Expert, Morale Builder, and Integrator.

The FACILITATOR gets the board aligned during key discussions and keeps the focus on common values.

The EXPERT contributes expertise as it relates to the decision-making process.

The MORALE BUILDER ensures that the board members maintain an optimistic attitude.

The INTEGRATOR builds new ideas on others' points of view.

As board members learn, understand, and practice each of these roles, they become more engaged and the board becomes dynamic.

The most valuable board member is the one who knows how to play each of these roles effortlessly and effectively at the time when it is most needed.
